

A Phipps Design

DESIGNING UNIQUE, AWARD-WINNING HOMES OF GRANDEUR.

A Phipps Design specializes in elegant exteriors and interiors of expansive homes in many of the finest communities in the South.

When designing homes that emanate grandeur, a clear, distinctive design philosophy is critical. For A Phipps Design, the formula for success is a blend of technical expertise; complete understanding of clients' lifestyles; thorough analysis of each property's advantages and challenges; along with meticulous planning from conception to completion. This attention to detail results in the creation of unique homes with elegant facades, gracious interiors, and stylistic proportions that make the most of waterfront views or other unique homesite features.

For more than 15 years, Brian Phipps of A Phipps Design has used this approach and a proficiency in CAD (Computer Aided Design) to successfully design spectacular homes. His award-winning designs occupy the resort areas

of North Carolina, Florida's prestigious east coast cities, including Boca Raton, Fort Lauderdale and Palm Beach, and Florida's west coast from Naples to Tarpon Springs. Because of his extensive experience with grand homes averaging more than 4,000 square feet, he is on the forefront of the construction trend of replacing residences built in the 1960s or '70s with new homes more in proportion with the value and beauty of their surroundings. Many of these new homes reflect the style and distinction of Florida's east coast architecture and the changing lifestyles of their owners.

"Our clients' lifestyles are much different now than they were 20 or 30 years ago," says Phipps. One major change Phipps points out is the expansion of living areas to include the outdoors. "We're designing large lanais that are actually extensions of indoor living spaces, with comfortable, inviting furniture, fireplaces that are focal points for outdoor entertaining, and disappearing-edge pools overlooking waterfront views."

Phipps provides clients with as much or as little assistance as needed in selecting and dealing with builders, subcontractors or interior designers. "Sometimes, the grandeur of a home with more than 4,000 square feet can be overwhelming, especially if clients have never owned a home of that size before," says Phipps. "Our clients often need the guidance of an experienced professional who can deal with the intricacies and details of coordinating all aspects of design."

Phipps' designs speak for themselves. His comprehensive approach and attention to detail are reflected in every masterpiece he creates.
